Personal Portfolio Website

Submitted By

M.K. Raghavisarada

B.Tech (Artificial Intelligence & Machine Learning)

Sandip University, Nashik

Introduction

This is my first Personal Portfolio Website developed using HTML, CSS, and a small amount of JavaScript. The purpose of this website is to present my educational background, technical skills, projects, certifications, and contact information in a professional manner. The website serves as my online portfolio, allowing recruiters, mentors, and other visitors to learn more about me and my work.

Objective

The main objective of this project is to create a responsive and user-friendly personal portfolio website that showcases my profile, technical skills, academic projects, certifications, and contact details. It also helps me improve my front-end web development skills while creating a professional online presence.

Technologies Used

HTML5

CSS3

JavaScript (Basic)

Visual Studio Code (VS Code)

Git & GitHub

Features Implemented

Home Page

Contact Section

Social Media Links

Responsive Layout

Smooth Navigation Menu

Professional User Interface

Development Process

I started this project by learning the fundamentals of HTML and CSS. Since this was my first portfolio website, I referred to YouTube tutorials and online learning resources to understand how a professional portfolio is designed.

First, I created the basic webpage structure using HTML. Then, I used CSS to design the layout, add colors, spacing, animations, and make the website visually attractive. Finally, I added simple JavaScript features to improve user interaction and navigation.

Throughout the project, I continuously tested the website and fixed errors to improve its appearance and responsiveness.

User Experience Considerations

While developing this website, I focused on providing a simple and clean user experience. The design is easy to navigate, and each section is organized properly so visitors can quickly find the required information.

The website is responsive and adjusts well to different screen sizes such as laptops, tablets, and mobile phones. I also selected readable fonts, attractive colors, and proper spacing to improve the overall user experience.

Website Architecture

The website is organized into multiple sections that are connected through the navigation menu.

Projects

Contact

Each section is linked using navigation links, allowing users to move smoothly throughout the website.

Challenges Faced

Since this was my first portfolio website, I faced several challenges during development.

Understanding HTML page structure.

Designing responsive layouts using CSS.

Aligning images, icons, and sections correctly.

Linking HTML and CSS files properly.

Styling different components professionally.

Debugging layout and navigation issues.

Making the website mobile-friendly.

Whenever I faced difficulties, I referred to YouTube tutorials, documentation, and online resources to understand the concepts better.

What I Learned

Through this project, I learned:

HTML webpage structure

CSS styling techniques

Basic JavaScript concepts

Responsive web design

Navigation bar creation

Creating professional portfolio websites

Debugging and problem-solving skills

Organizing multiple webpage sections

Conclusion

Developing this Personal Portfolio Website was a valuable learning experience. It helped me strengthen my knowledge of HTML, CSS, and basic JavaScript while improving my understanding of responsive web design. Although I faced several challenges during development, completing this project increased my confidence in front-end web development. This portfolio website represents my learning journey and serves as a professional platform to showcase my skills, projects, and achievements.

About Me

I'm an AI & Machine Learning Enthusiast

I am a second-year B.Tech student specializing in Artificial Intelligence and Machine Learning. I am passionate about building intelligent solutions and continuously improving my skills in AI, machine learning, Python, and web development. I enjoy creating practical projects, exploring new technologies, and learning through hands-on experience.

My Skills & Certifications
Web Development
HTML, CSS, JavaScript, and responsive portfolio websites. Built responsive websites using HTML, CSS, and basic JavaScript. Completed projects including a Tourism Website, Personal Portfolio Website, and a Real Estate Website. Passionate about improving my frontend development skills through hands-on projects.
Read More
Python
Completed beginner-level Python programming with a strong understanding of core concepts such as variables, loops, functions, and conditional statements. Built mini projects including a Simple Calculator and a Quadratic Equation Solver to strengthen problem-solving and programming skills. Continuously learning Python to build a solid foundation for AI.

AI & ML

AI & Machine Learning: Familiar with the fundamentals of AI and Machine Learning through introductory learning and certification courses. Gained basic knowledge of concepts such as Prompt Engineering and Generative AI tools. Currently building a strong foundation and continuously exploring AI/ML technologies to develop practical skills and real-world projects.

Read More

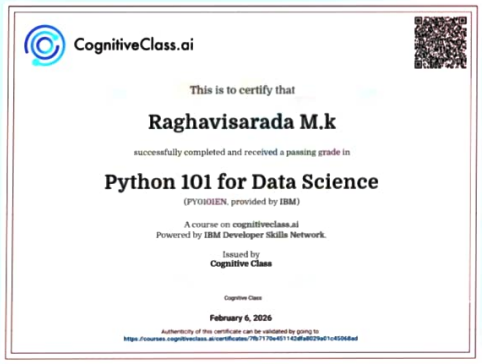

C programming

Built a strong foundation in programming through C language. Familiar with variables, loops, functions, arrays, pointers, and problem-solving concepts that support software development.

Certificate of Completion

M.k.Raghavisarada

has successfully completed the HP LIFE online course

Critical Thinking in the AI Era

By completing this course, the above-named student has learned how to use critical thinking to make better decisions. They have developed the skills to understand how AI-generated content can distort the truth, learned strategies to counteract the impact of biases on decision-making, and discovered practical tools to fact check information.
